Dear Valued Customer:

Recently you received a letter detailing how the City of San Carlos and Pacific Gas and Electric Company (PG&E) have been working closely together to ensure the safe operations of a PG&E natural gas transmission pipeline running along Brittan Avenue in San Carlos. As a part of the promise to keep you informed of our progress, we would like to invite you to attend an Open House to discuss PG&E's safety-related work on Natural Gas Transmission line 147 and other areas of San Carlos:

**Please Join Us for a Community Meeting
Wednesday, April 16th, 2014 from 5-7pm
Trinity Presbyterian Church Fellowship Hall
1106 Alameda De Las Pulgas, San Carlos**

This meeting will provide information on recent and upcoming work on Natural Gas Transmission Line 147, planned upgrades, inspections, and surveys on the line, and other areas of PG&E work within San Carlos, such as planned electric enhancement projects. Members from PG&E customer service, gas and electric operations, and local government representatives, as well as City Officials, and other local community leaders from the City of San Carlos, will be in attendance. As a courtesy reminder you will also receive a postcard inviting you to the Open House a few days before the event.

We sincerely hope that we can see you on April 16th to answer any questions you may have about the important gas work being performed in San Carlos on Line 147, or any other PG&E related project. The safety of the community, the integrity of Line 147, which plays an important role in San Mateo County's gas transmission pipeline system, and communicating our progress to you in meeting these commitments, the residents of San Carlos, are our top priorities. In the meantime you may always make use of the following resources if you have questions, or want additional information:

- Contact your local PG&E Customer Care Manager Frank Salguero at francisco.salguero@pge.com.
- Visit the City of San Carlos Line 147 website at www.cityofsancarlos.org/depts/cm/pge/default.asp.
- Learn more about what PG&E is doing to enhance the safety and reliability of the entire gas system at www.pge.com/seeourprogress.

Sincerely,

Frank Salguero
